2022

PHYSIOLOGY

[Honours]

(B.Sc. Second Semester End Examination-2022) PAPER-C4T

Full Marks: 40

Time: 02 Hrs

The figures in the right hand margin indicate marks

Candidates are required to give their answers in their own words as

far as practicable

Illustrate the answers wherever necessary

A. Answer any five questions from the following:

5x2 = 10

- 1. What do you mean by EPSP &IPSP.
- 2. What are nerve growth factors?
- 3. Describe the 'all or none law'.
- 4. What is single unit smooth muscle?
- 5. What is EMG?
- 6. What is Synaptic delay?
- 7. What is motor point?
- 8. What is chronaxie and Rheobase?

B. Answer any four questions from the following:

4x5 = 20

Describe the ionic basis of nerve action potential with suitable diagram.

2.	2. What do you understand by end-plate potential and post-te	
	potentiaion?	3+2
3.	Mention the role of calcium ion in muscle contraction.	5
4.	Write down the differences between isometric and	isotonic
	contractions.	5
5.	Describe the electron microscopic structure of	skeletal
	myofibril.	5
6.	Describe the mechanism of smooth muscle contraction	on with
	special emphasis on MLCK.	5
C. An	swer any one question of the following: 1x	10 = 10
C. An	swer any one question of the following: a) Discuss the chemical and electrical changes in	
	V 1	
	a) Discuss the chemical and electrical changes in	skeletal
	a) Discuss the chemical and electrical changes in muscle during contraction and relaxation.	skeletal 4+4
1.	a) Discuss the chemical and electrical changes in muscle during contraction and relaxation.b) What do you mean by tetanus and fatigue?	skeletal 4+4 1+1
1.	a) Discuss the chemical and electrical changes in muscle during contraction and relaxation.b) What do you mean by tetanus and fatigue?a) what are antagonists and agonist?	skeletal 4+4 1+1 2
1.	a) Discuss the chemical and electrical changes in muscle during contraction and relaxation.b) What do you mean by tetanus and fatigue?a) what are antagonists and agonist?b) What is refractory period?	skeletal 4+4 1+1 2 2
1.	a) Discuss the chemical and electrical changes in muscle during contraction and relaxation.b) What do you mean by tetanus and fatigue?a) what are antagonists and agonist?b) What is refractory period?c) what is Rynodine receptor nd DHP receptor?	skeletal 4+4 1+1 2 2 2 2
